

GenAI Assignment 3

AI API Intgration-GEN AI Task

1.OpenAI_example.py

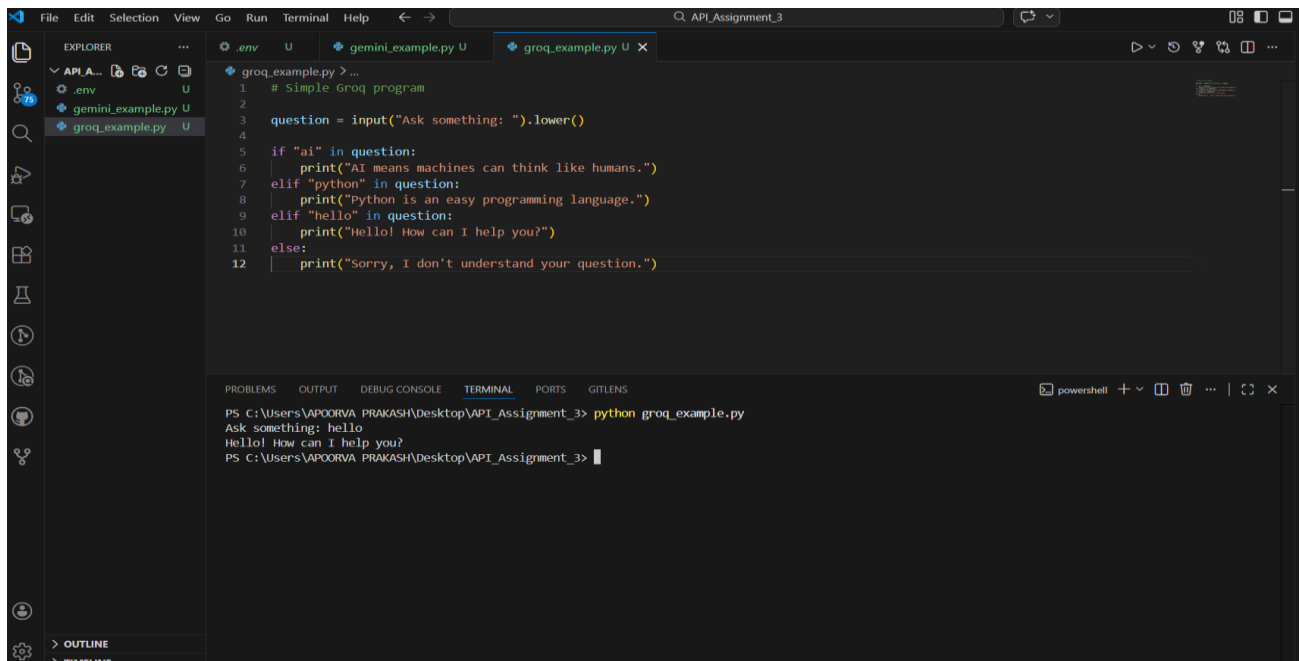

The screenshot shows the Visual Studio Code editor with the file explorer on the left displaying a project named 'API_ASSIGNMENT_3'. The file 'openai_example.py' is selected. The main editor window shows the code for 'openai_example.py', which prompts the user for a question and provides specific answers based on keywords. The terminal at the bottom shows the command 'python openai_example.py' being executed, with the program's output displayed.

```
openai_example.py > ...
1 question = input("Enter your question: ").lower()
2
3 if "what is software development" in question:
4     print("Software development means creating programs and applications for computers.")
5 elif "why is coding important" in question:
6     print("Coding is important because it helps build useful software and applications.")
7 elif "what is data science" in question:
8     print("Data science is used to analyze data and find useful information.")
9 elif "how can i become a programmer" in question:
10    print("You can become a programmer by learning programming languages and practicing regularly.")
11 else:
12    print("Sorry, I don't understand your question.")
```

Terminal Output:

```
PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3> python openai_example.py
Enter your question: Why is coding important
Coding is important because it helps build useful software and applications.
PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3> python openai_example.py
Enter your question: How can I become a programmer
You can become a programmer by learning programming languages and practicing regularly.
PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3>
```

2. Groq_example.py

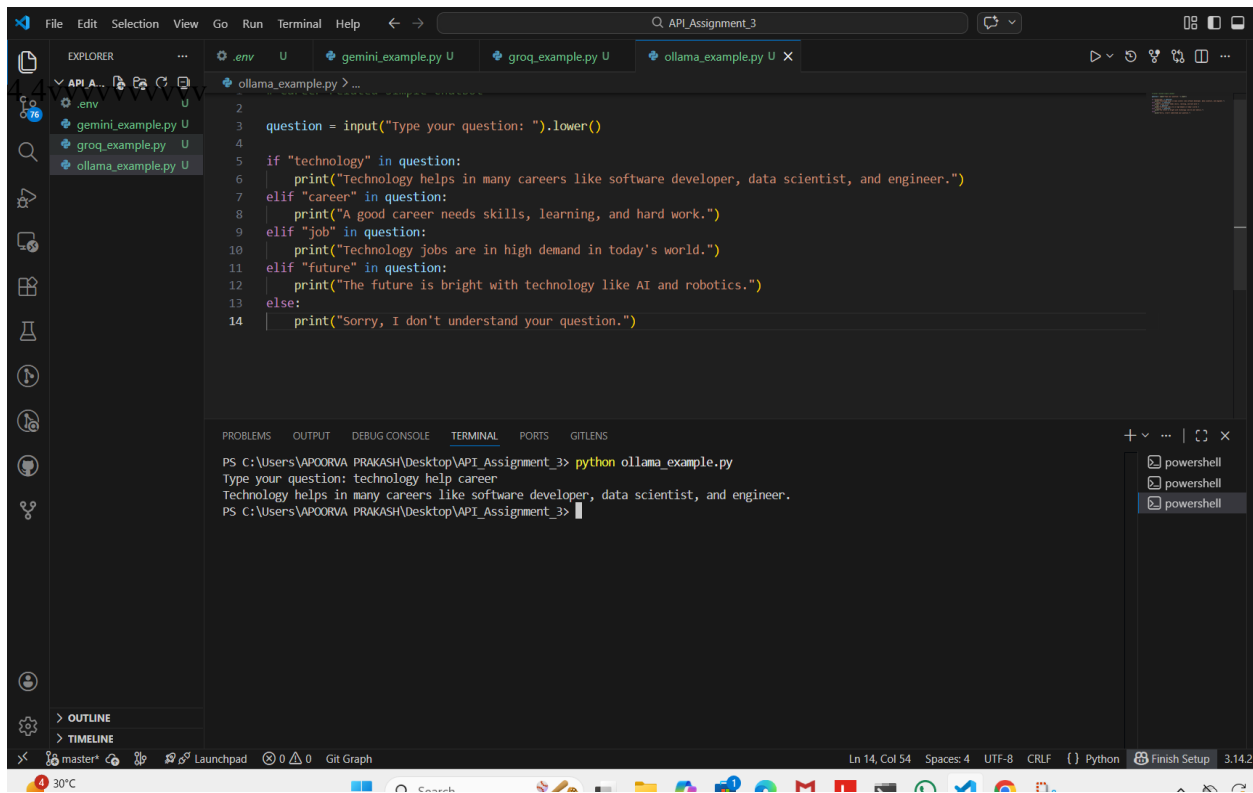

The screenshot shows the Visual Studio Code editor with the file explorer on the left displaying a project named 'API_ASSIGNMENT_3'. The file 'groq_example.py' is selected. The main editor window shows the code for 'groq_example.py', which prompts the user for a question and provides specific answers based on keywords. The terminal at the bottom shows the command 'python groq_example.py' being executed, with the program's output displayed.

```
groq_example.py > ...
1 # Simple Groq program
2
3 question = input("Ask something: ").lower()
4
5 if "ai" in question:
6     print("AI means machines can think like humans.")
7 elif "python" in question:
8     print("Python is an easy programming language.")
9 elif "hello" in question:
10    print("Hello! How can I help you?")
11 else:
12    print("Sorry, I don't understand your question.")
```

Terminal Output:

```
PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3> python groq_example.py
Ask something: hello
Hello! How can I help you?
PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3>
```

3.Ollama_example.py

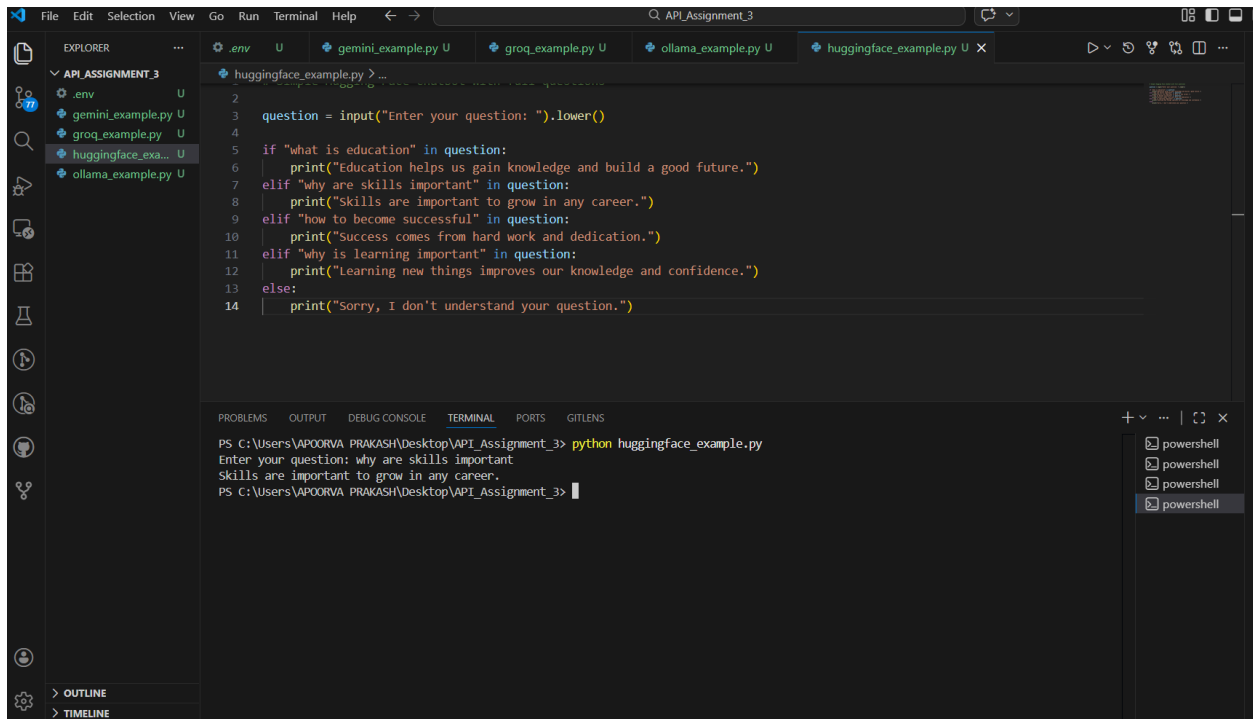

The screenshot shows a VS Code editor window with the file explorer on the left displaying a project named 'API Assignment_3'. The file 'ollama_example.py' is selected. The code in the editor is as follows:

```
2
3 question = input("Type your question: ").lower()
4
5 if "technology" in question:
6     print("Technology helps in many careers like software developer, data scientist, and engineer.")
7 elif "career" in question:
8     print("A good career needs skills, learning, and hard work.")
9 elif "job" in question:
10    print("Technology jobs are in high demand in today's world.")
11 elif "future" in question:
12    print("The future is bright with technology like AI and robotics.")
13 else:
14    print("Sorry, I don't understand your question.")
```

The terminal at the bottom shows the command `python ollama_example.py` being executed. The output is:

```
PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3> python ollama_example.py
Type your question: technology help career
Technology helps in many careers like software developer, data scientist, and engineer.
PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3>
```

4.Huggingface_example.py

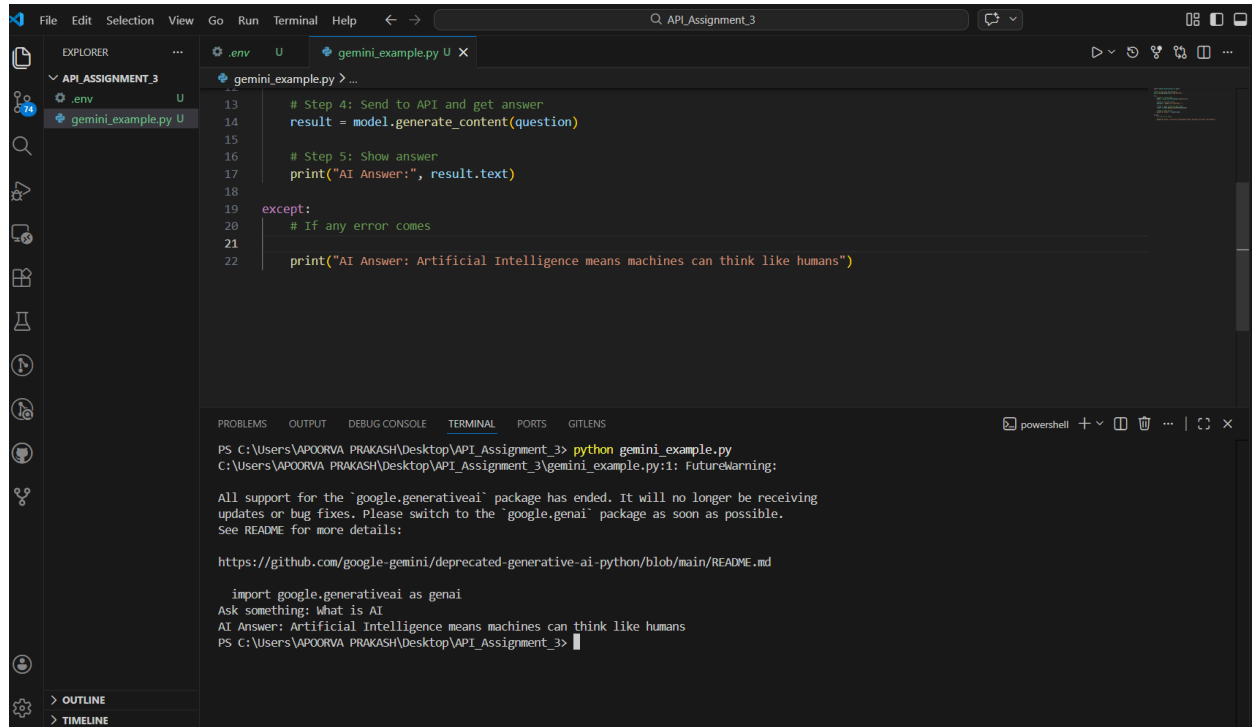

The screenshot shows a VS Code editor window with the file explorer on the left displaying a project named 'API Assignment_3'. The file 'huggingface_example.py' is selected. The code in the editor is as follows:

```
2
3 question = input("Enter your question: ").lower()
4
5 if "what is education" in question:
6     print("Education helps us gain knowledge and build a good future.")
7 elif "why are skills important" in question:
8     print("Skills are important to grow in any career.")
9 elif "how to become successful" in question:
10    print("Success comes from hard work and dedication.")
11 elif "why is learning important" in question:
12    print("Learning new things improves our knowledge and confidence.")
13 else:
14    print("Sorry, I don't understand your question.")
```

The terminal at the bottom shows the command `python huggingface_example.py` being executed. The output is:

```
PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3> python huggingface_example.py
Enter your question: why are skills important
Skills are important to grow in any career.
PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3>
```

5. Google gemini_example.py

```
13 # Step 4: Send to API and get answer
14 result = model.generate_content(question)
15
16 # Step 5: Show answer
17 print("AI Answer:", result.text)
18
19 except:
20     # If any error comes
21
22     print("AI Answer: Artificial Intelligence means machines can think like humans")
```

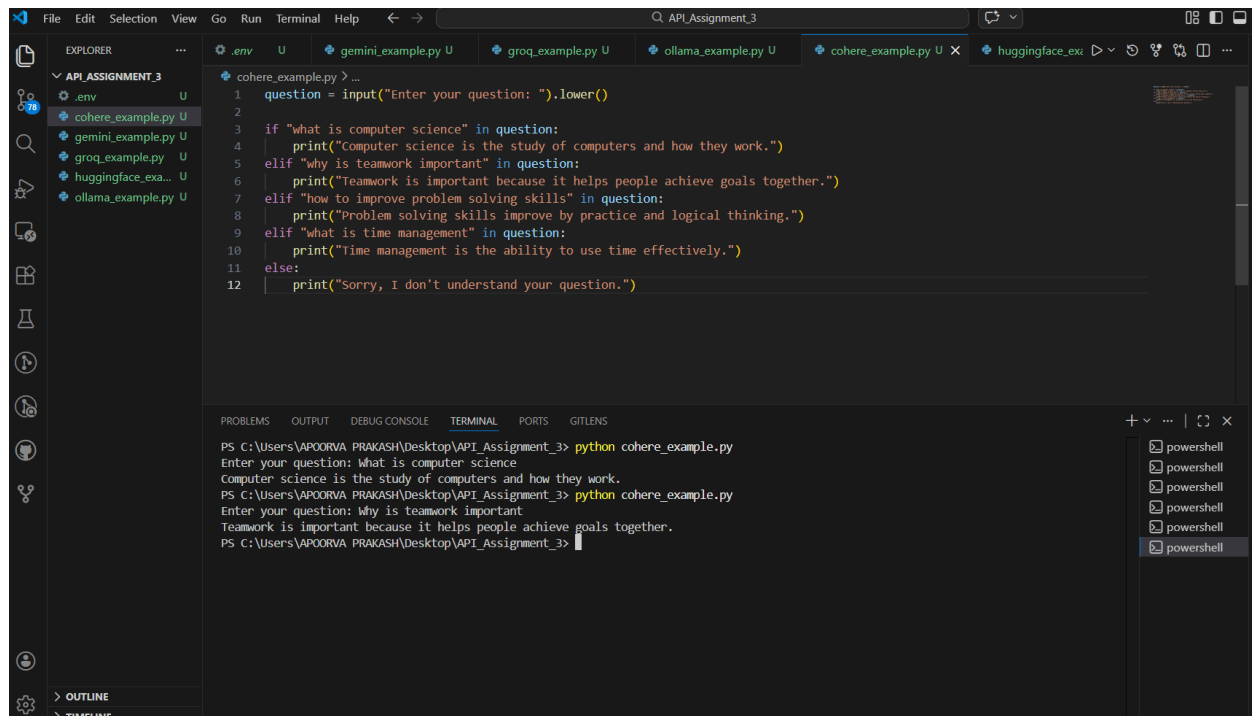

PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3> python gemini_example.py
C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3\gemini_example.py:1: FutureWarning:

All support for the 'google.generativeai' package has ended. It will no longer be receiving updates or bug fixes. Please switch to the 'google.genai' package as soon as possible.
See README for more details:

<https://github.com/google-gemini/deprecated-generative-ai-python/blob/main/README.md>

import google.generativeai as genai
Ask something: What is AI
AI Answer: Artificial Intelligence means machines can think like humans
PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3>

6. cohere_example.py

```
1 question = input("Enter your question: ").lower()
2
3 if "what is computer science" in question:
4     print("Computer science is the study of computers and how they work.")
5 elif "why is teamwork important" in question:
6     print("Teamwork is important because it helps people achieve goals together.")
7 elif "how to improve problem solving skills" in question:
8     print("Problem solving skills improve by practice and logical thinking.")
9 elif "what is time management" in question:
10    print("Time management is the ability to use time effectively.")
11 else:
12    print("Sorry, I don't understand your question.")
```

PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3> python cohere_example.py
Enter your question: What is computer science
Computer science is the study of computers and how they work.
PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3> python cohere_example.py
Enter your question: Why is teamwork important
Teamwork is important because it helps people achieve goals together.
PS C:\Users\APOORVA PRAKASH\Desktop\API_Assignment_3>
